The Nuclear Facility Operations Manager oversees and manages members of the workforce within the department who provide the expertise to operate nuclear facilities and complex nuclear programmatic equipment, such as unique nuclear research reactors. The manager coordinates subordinate employee recruitment, selection, training, performance assessment, work assignments, salary, and recognition and disciplinary actions and ensures that adequate rigor and formality of operations is maintained at the nuclear facilities. The manager ensures that the Safety Basis documents for the facility are up to date and implemented correctly and that customer needs are satisfied by managing and coordinating specific deliverables, overall program and project plans, budgets, structures, schedules, and staffing requirements.
