

Trinity Section Objectives

- To encourage the public understanding of nuclear science and engineering;
- To foster closer professional and personal relations among the members;
- To cooperate with other scientific and professional groups having similar objectives;
- To engage in such other activities as may be appropriate for the fulfillment of the objectives of the Society, and
- To stimulate membership growth and participation by encouraging the creation of Branches at locations within the Section assigned area.

The **National Museum of Nuclear Science & History** (formerly the National Atomic Museum) is a Smithsonian Affiliate and is the nation's only congressionally chartered museum in its field. The National Museum of Nuclear Science & History was established in 1969 as an intriguing place to learn the story of the Atomic Age, from early research of nuclear development through today's peaceful uses of nuclear technology.

The Museum relocated to its current location at 601 Eubank Blvd SE in April 2009. This 30,000-sq-ft building and 9-acre outdoor exhibit area house temporary and permanent exhibitions including Nuclear Medicine, Energy Encounters, Decision to Drop, Atomic Pop Culture, Nano and more. The Museum also hosts Little Albert's Lab, an area where young, inquisitive minds can explore hands-on science activities. The popular outdoor exhibit area, known as Heritage Park, houses planes, rockets, missiles, cannons and a nuclear submarine sail.

The museum strives to present, through permanent and changing exhibits and displays, the diverse applications of nuclear energy in the past, present and future along with the stories of the field's pioneers. It is a place to learn, to imagine, to think and to draw your own conclusions.

Public Information and

Section members! As the new
Chair of the Public Information
Section, I invite you to all attend

Outreach

- Mentorship connections (via the website)
- Science fair judging
- Public-facing Q&A online
- Teacher workshops
- Workshop kit assembly
- Boy Scouts (Nuclear Science Merit Badge)
- Gir Scouts (Get to Know Nuclear)
- Virtual field trips
- Nuclear @ Home
- Direct outreach to schools
- Environmental justice initiative
- Summer camp sponsorship
- Interfaith bulletins board
- Carl Willis, Chief Recator Supervisor, UNM
(505) 412-3277, carlwillis@unm.edu
- Community Chair, Trinity Section PI&G
(505) 412-3277, carlwillis@unm.edu
- In 2010 and 2012, Trinity Section received the Best Public Information and Education Award in the Small Local Section category.

2024-2025 Trinity Section Officers

UNM Student Section

ANS Thirty Section works closely with the UNM Student Section, whose President serves on the Thirty Executive Committee.

2024-2025 Trinity Section Officers	
Executive Committee:	Officers
Miriam Kehler, Chair (25), LANL	Rowdy Davils, Vice-Chair/Chair-Elect (25), Vernon Research
Jameson Hettick, Secretary (27), Conservation	May Alice Cusenberry, Treasurer (27), SNL
Nick Thompson, Immediate Past Chair (25), LANL	Eric Lang, At-large (25), UNM
Peter Macdonell, UNM Student Section President (25)	Char Willis, At-large (25), UNM
Gh! Scouts (Get to Know Nuclear)	Eric Lang, At-large (25), UNM
Boy Scouts (Nuclear Science Merit Badge)	Nick Whiteman, At-large (26), XXX
Workshop kit assembly	Wacant, At-large (26), XXX
Teacher workshops	Austini Nicros, At-large (27), LANL
Public-facing Q&A online	Hannach Patenauude, At-large (27), LANL
Science fair judging	Carli Willis, Public Information & Outreach, UNM
Mentorship connections (via the website)	Committee Chairs:
Outreach ideas:	Char Willis, Chief Reactor Supervisor, UNM (505) 412-3277, carlwillis@unm.edu Committee Chair, Trinity Section PIs&O (505) 412-3277, carlwillis@unm.edu Chair Willis, Chief Reactor Supervisor, UNM in 2010 and 2012, Trinity Section received the Best Public Information and Education Award in the Small Local Section category.

must be curated. However, there are a number of ways we can leverage opportunity in the immediate term to develop a more robust and creative online presence, and there is also no time like the present for planning ahead for when circumstances be- come more favorable. My suggestions are hardly exhaustive, so please feel free to add your thoughts via email, or give me a call. Once I have an idea of where membership interests lie, I'll de- velop a more targeted agenda for outreach that will be appealing and help us build a robust and active committee. Thanks for your attention, and I look forward to working with you!

Questions & All Topics

Public Information and Outreach

The Trinity Exchange comm. finds new ways to make an impact on students and the city of Albuquerque. The ANS Student Section hosts a variety of outreach events, meetings, and social gatherings to build connections with the community. This past year and for their fifth year in a row, the Section placed in the top 3 for the 2022 ANS Samuel Glassstone Award, demonstrating their outstanding service as an ANS Student Section. Moving forward, UNM ANS plans to continue their work on expanding knowledge and interest in nuclear science. This year the Section will work on events tailored to-ward communities and help us build a robust and active committee. Thanks for your attention, and I look forward to working with you!

Section members! As the new chair of the Public Information & Outreach Committee, I would like to solicit your feedback on a handful of ideas for outreach in this challenging pandemic. Obviously, more traditional in-person activities must be curtailed. However, there are a number of ways we can leverage opportunity in the immediate term to develop a more robust and creative online presence, and there is also no time like the present for planning ahead for when circumstances change.

My suggestions are hardly exhaustive, so please feel free to add your thoughts via email, or give me a call. Once I have an idea of where membership interest lies, I'll de-

velop a more targeted agenda for outreach that will be appealing and help us build a robust and active committee. Thanks for your attention, and I look forward to working with you!

Any change occurring within closely with the UNM Student Sec-

ANS TipCity Section Works "N" N M UNM Student Section Public Information and Outreach

The ANS has made its ANS initiative part of its Strategic Plan (www.ans.org/about/plan). The goal of this initiative is to leverage the diversity of sectors, interests, backgrounds, and expertise of ANS members. If someone you know is a national member but not seen a local member at a Trinity meeting in a while, make sure they are still receiving our promotional blasts. The national Society does much to promote nuclear science, technology, and policy to the benefit of the entire nuclear community. The local section is the most effective means to promote education and outreach in our local area. Your involvement, dues, and donations go to supporting nuclear engineering students at UNM as they prepare for their careers, providing judges and awards to high school science fairs, and funding outreach in the community. The Trinity Section has also been integral in planning highly successful technical conferences in NM.

The ANS is here to support you, and the Trinity Section is the place to engage with the local community, fellow members, and tomorrow's nuclear leaders. For more information about Trinity Section activities, about member rows, or to be added to the mailing list for notices of sponsored events in NM, visit <http://www.ans.org/trinity/>. For information about the ANS National organization and its activities, visit <http://www.ans.org/>.

Nuclear stories in the future is uranium instead. A new generation of small modular reactors will make nuclear power more flexible and afforda- ble. Multiple pieces of recent legislation have been passed to facilitate advanced nuclear inno- vation and multiple reactor startup com- panies are creating new life within the nuclear power community. Nuclear stockpile steward- ship, nonproliferation, and safeguards remain as vital as ever in promoting peace and security around the world. Nuclear medicine is still saving countless lives.
