4500 Blue Clay Road

Castle Hayne, NC 28429

Open to the public

Free hors d'oeuvres

Margaret Harding

President & CEO of:

Nuclear Energy: Power for the Future Communication is the Key

Margaret will be busting a few nuclear myths and giving ANS section members good information and techniques for communicating about nuclear power to a more general audience. Since she left GE in 2009, Margaret has spent considerable time talking to reporters and journalists from all over the world as well as policy makers and congressional staff about the importance of nuclear energy national and maintaining US influence globally.

During the weeks after the events in 2011, Margaret took over 400 media inquiries and was quoted in numerous national and international publications as well as appearing on a variety of national networks. Her efforts resulted in an special award from ANS in 2012 for her specific efforts in communicating about Fukushima.

Margaret isn't a professional communicator, but a fellow engineer. She provides a unique perspective on ways to communicate about our technology and why it is so important.

She expects to see her former colleagues from GE in the audience!
