

TVA Hire Date

October 2018

TIMOTHY S. RAUSCH

TIM

TVA Nuclear

CHIEF NUCLEAR OFFICER

Biographical Data

Tim joined TVA in October 2018 as Chief Nuclear Officer having overall responsibility for the TVA's entire Nuclear Fleet consisting of seven units among Browns Ferry, Sequoyah and Watts Bar Nuclear stations.

Prior to that Tim was Talen Energy's senior vice president and Chief Nuclear Officer, responsible for the Susquehanna nuclear power plant, a two-unit, 2,700 megawatt facility in Luzerne County, Pennsylvania.

Tim had been at the Susquehanna plant since 2009 and has 30 years of experience in virtually all the disciplines of the nuclear power industry. He began his nuclear career with GPU Nuclear Corp. as an operator training instructor at the Oyster Creek plant in New Jersey. After moving to FirstEnergy's Perry nuclear plant in Ohio, he served in leadership positions in operations, maintenance, engineering, training, quality and refueling outages before being named plant general manager in 2002. In 2004, he accepted a position with Exelon Nuclear Corp., where he served as design engineering director, engineering director for the Exelon fleet, and site vice president of the Oyster Creek plant.

Mr. Rausch is actively engaged in nuclear industry organizations and holds leadership positions with the Nuclear Energy Institute and the Electric Power Research Institute. He is also a member of the U.S. Women in Nuclear Executive Advisory Council.

He earned a Bachelor of Science degree in nuclear engineering from the University of Cincinnati and an MBA from Cleveland State University.
