"The Prospects for New Nuclear Plants in the US"

[Download Mr. Grecheck Presentation](#)

Mr. Grecheck briefly reviewed how excellent present plant performance has enabled us to once begin seriously discussing the possibility of building a new unit. He reviewed the new NRC licensing process, and what activities are currently underway in Design Certification and Early Site Permitting, including the Dominion application for an early site permit for the North Anna site. Mr. Grecheck concluded with reviewing the remaining barriers that must be overcome before a build decision could be made.

Eugene S. Grecheck is Vice President Nuclear Support Services for Dominion Energy, Inc., based in Richmond, VA. His staff is responsible for providing support to Dominion's 6 nuclear units in Virginia and Connecticut. These services include nuclear security, training, licensing and regulatory interface, emergency planning, industrial safety, and operational support. He is also responsible for Dominion's new nuclear plant activities. He is a member of the Nuclear Energy Institute Executive Task Force on new plants and the Electric Power Research Institute Advanced Nuclear Plant Steering Committee, and is actively involved with each of the major reactor vendors, as well as the Department of Energy, working on addressing the barriers to deployment of new nuclear plants in the United States.

Grecheck is a native of Schenectady, NY, and received a BS degree in Physics and an MS in Nuclear Engineering from Rensselaer Polytechnic Institute. He earned an MBA from Virginia Commonwealth University and an MBA upgrade from Syracuse University. He also completed The Executive Program at the Darden Graduate School of the University of Virginia.

His over 28-year career with Dominion has included a wide variety of leadership positions at all three of Dominion's nuclear stations as well as the corporate offices in Richmond. He has been Manager of Corporate Nuclear Engineering, plant manager at North Anna, Site Vice President at Surry, and Vice President of Nuclear Operations at the Millstone station in Connecticut, which Dominion purchased in early 2001.

Grecheck and his wife, Barbara, have two children and live in the Richmond area.
